The Boeing 737 is a narrow-body aircraft produced by Boeing at its Renton Factory in Washington. Developed to supplement the Boeing 727 on short and thin routes, the twinjet retains the 707 fuselage cross-section and nose with two underwing turbofans. Envisioned in 1964, the initial 737-100 made its first flight in April 1967 and entered service in February 1968 with Lufthansa.

The system was not part of previous 737 models. MCAS was added because the Max's larger engines, which are mounted higher and farther forward on the 737's low-swept wings, gave the plane a tendency to tilt too far nose-up in some conditions. Boeing downplayed the significance of MCAS and didn't mention it in airplane manuals.
