Mechanical, electrical and plumbing (MEP) refers to these aspects of building design and construction. In commercial buildings, these elements are often designed by a specialized engineering firm. MEP design is important for planning, decision making, accurate documentation, performance- and cost-estimation, construction, and operating/maintaining the resulting facilities.

Grease Production Calculation Example: A full fare BBQ FSF serving approximately 350 meals per day on washable dishes and flatware with a 90-day pump schedule. Select the "Very high grease producer (with flatware)" value from Table 8-3 and calculate the daily grease load as follows: 350 meals per day × 0.075 lbs per meal = 26.25 lbs of grease per day.
